Get more with Praxair...

**Customized answers.** Praxair Surface Technologies EXTREME Protection™ and ProtectionPLUS™ coatings combined with SermeTel®, ShorCoat®, SermaLoy™, SermaFlow™, and SermaLon® slurry coatings for the ultimate in flexibility, ensuring we have the right answer for your unique challenge.

**Design and application support.** Our coatings help bring out the best in your components, while you always get the confidence of knowing your parts have been through real-world simulations.

**Uniformity and repeatability.** Whether your parts are produced in the Americas, Europe or Asia, you know you’re getting consistent results you can rely on.

**Innovation.** Our scientists, renowned throughout the coating industry, rank among the most authoritative sources in application techniques, always looking for new surface enhancement options.
Aircraft Engine Applications

• Actuator components
• Afterburner assemblies
• Bearings and accessories
• Combustion chambers
• Combustion flame tubes
• Compressor air foils
• Compressor drums
• Discs and shafts
• Fuel nozzles and swirlers
• Rim cover plates
• Rings and seals
• Turbine air foils
• Turbine discs
• Turbine shrouds
